

PSIA-I Level II and Level III Assessment Quick Reference Guide

There are two different types of assessments offered for the PSIA-I Level II and Level III certification process. The traditional Individual Day format and the Coached 2-Day format. These assessment types may be taken in combination, there is no requirement to take all the Individual or Coached format. There is no requirement to take the ski or teach assessment prior to the other. The online test is required to be successfully completed prior to registering and participating in the on-snow events.

The purpose of offering two different types of assessments is to give greater flexibility and opportunity for member seeking level II and level III certification.

PSIA-I Coached 2-Day Assessment Process

These are the assessments available in the coached format:

- Level II Teach Assessment
- Level II Ski Assessment
- Level III Teach Assessment
- Level III Ski Assessment

Maximum of 6 participants

Education clinic prerequisites are still required

Participants will attend all both days

Group leaders will remain the same for both days.

The purpose of the Coached 2-Day Assessments is to help participants with additional clarity of task and performance based coaching. This is not a skills acquisition clinic.
