

Hello! My name is Shawn Jimerson, and I am an instructor at the National Ability Center. I have thrown my name into the mix to run as a member-at-large for a position on the PSIA/AASI-I Board this year. It is my hope to represent the National Ability Center and the many resorts we serve.

In addition to being certified as a Level I Alpine and Level III Adaptive, I have enjoyed the privilege of being part of the NAC's education staff. Additionally, I serve as an Adaptive, Division Education and Certification Leader. It has been my pleasure to have worked for the National Ability Center for 16 years and a member in good standing with PSIA since March of 2005.

Of primary interest for me in serving on the PSIA/AASI-I Board is to increase my involvement in the sport and its growth. It is my hope to bring additional Adaptive knowledge, representation and voice to the Board. Each of our disciplines has experience, knowledge and lessons to share with one another and that translates across, and to, the ways we all enjoy the snow. To better meet the demands of our clients, it increasingly makes sense to share our knowledge and expand our work together. Whether we specialize in Alpine, Snowboard, Children or Adaptive, our clients will all benefit from our combined depth of snow sliding skills.

Thank you for your consideration of my candidacy.
